## Groupe ADP wins a tender in the Kingdom of Bahrain to design the new Air Traffic Control Centre of Bahrain International Airport

**Groupe ADP, through its 100%-owned subsidiary, ADP Ingénierie, has been selected by the Ministry of Transportation and Telecommunications of the Kingdom of Bahrain to design and carry out work supervision of the new Air Traffic Control Centre of Bahrain International Airport.**

Winner of the international tender organized by the Air Navigation Service, representing the Ministry of Transportation and Telecommunications (MoTT) of the Kingdom of Bahrain, ADP Ingénierie, a Groupe ADP subsidiary, has been selected for the design and the supervision of works for the new Regional Air Traffic Control Centre located at Bahrain International Airport. **This centre occupies a total surface area of approximately 3,000 sqm.**

ADP Ingénierie has just signed an **18-month contract**, which addresses two priorities:

- ◆ To maintain and elevate the efficiency of the region's air traffic control operations, in strict compliance with international standards, mainly during *en-route* flight phases;
- ◆ To upgrade the air navigation facilities to cope with the rapid growth in the region's air traffic and to allow airlines to optimise their capacities, while enabling them to operate safe and efficient flights.

The approach of ADP Ingénierie, based on a **three-level design**, makes it possible to ensure the continuous use of systems by segregating the space dedicated to equipment from that devoted to the operational functioning. This design eases the servicing and the maintenance of the equipment. The unique character of the building stems from the maximum use of natural light, the shade over the rest area accessible to the centre's employees, and a signature with a roof terrace open to the outside.

The combination of concrete walls and columns, steel framing and composite decks, lends the building a harmonious modernity that blends in with the new passenger terminal nearby, also designed by ADP Ingénierie.

**Gratien Maire, CEO of ADP Ingénierie** declared:

*"The decision of the authorities of the Kingdom of Bahrain to award ADP Ingénierie the contract for the design studies for the new Air Traffic Control Centre bolsters our presence in the country and their recognition of our expertise. This choice comes while we are already in the process of designing the airport's new passenger terminal. The close and trusting relationship with this customer, combined with the detailed knowledge of their expectations, has enabled us to meet the specific needs expressed for this new air traffic control centre."*

### **About ADP Ingénierie**

A wholly-owned Aéroports de Paris SA-Groupe ADP subsidiary, ADP Ingénierie is a world leader in design and consulting for development or planning of international airport infrastructures. Its teams of designers and engineers can accompany a project from the initial design through to the operational phase. ADP Ingénierie groups together multiple skills, from engineering to architecture, studies and the supervision of works. ADP Ingénierie can also act in the role of Prime Contractor or Project Manager (both in the study phase and in the project supervision phase), as well as project management.

Formed in 2000, with 400 employees, ADP Ingénierie is presently carrying out over 120 projects concurrently worldwide. In 2016, ADP Ingénierie posted revenue of €75million.

Groupe ADP builds, develops and manages airports, including Paris-Charles de Gaulle, Paris-Orly and Paris-Le Bourget. In 2016, Paris Aéroport handled more than 97 million passengers and 2.2 million metric tonnes of freight and mail at Paris-Charles de Gaulle and Paris-Orly, and more than 42 million passengers at airports abroad, through its subsidiary ADP Management. Boasting an exceptional geographic location and a major catchment area, the Group is pursuing its strategy of adapting and modernising its terminal facilities and upgrading quality of services; the Group also intends to develop its retail and real estate businesses. In 2016, Group revenue stood at €2,947 million and net income at €435 million.

Registered office: 1 rue de France, 93290 Tremblay en France. Aéroports de Paris is a public limited company (Société Anonyme) with share capital of €296,881,806. Registered in the Trade and Company Register under no. 552 016 628 RCS Bobigny. [groupeadp.fr](http://groupeadp.fr)
